- 

**BUSINESS EXPERIENCE**

- 2020 - 2021 BOSCH, Budapest, Hungary**  
**Software Engineer within Near Range Camera Systems, Automotive (8 months)**
  - Collaborated with 3 teams from Hungary, Germany and India to implement new views and overlays in C++ in parking camera visualisation for customer models due to launch in 2022.
  - Initiated and led the improvement of the integration of new car parameter signals, dependent on 3 separate teams, improving the handover and reducing errors due to miscommunication.
  - Created a Python script which identifies mismatches between 2 repositories that lead to a runtime error, the script allows for skipping a 45 min compile and test process from before.
  - Implemented defect fixes in C++ regarding operating logic and code quality.
- 2020 PROMELEK S.A., Cluj, Romania**  
*Electrical Equipment Distribution and Electrical Solutions Company*  
**Digitalisation Consultant (3 months)**
  - Developed Microsoft Power Automate Business Process Flow to simplify and unify the tracking of product returns from clients.
  - Held an online presentation teaching 10 people how to use the tool that I created for them.
  - Achieved 15% reduction in user input mistakes by unifying the return/complaint tracking into a single interface, allowing for precise tracking of each stage of the return process.
- 2019 HUMATICA, London, United Kingdom**  
**Business Analyst Intern (3 months)**
  - Modelled the size of the High Net-Worth wealth management market and segmented it into 20 dimensions for the client.
  - Visualised the percentage of customers acquired within each market segment by the client, resulting in the identification of 5 growth areas.
  - Wrote a 5 and 10 year outlook report on the effects of Automation and AI on operating models across industries, providing a roadmap for sectors where management consulting might be needed.
  - Presented the analyses techniques and data sources in the excel models, during 3 client meetings accompanying the partner and manager
- 2017 ELEKTRA S.A. San Sebastian, Spain**  
*Electrical Equipment Distribution and Industrial Automations Company*  
**Research Intern (1 month)**
  - Researched topics that fall under the umbrella term Industry 4.0, such as: predictive maintenance, AR assisted production lines, machine learning, collaborative robots.
  - Wrote, recoded and edited one in-depth explanatory and one marketing video about the technologies enabling the next industrial revolution, both of are still in use at the company.
  - Shadowed the head of the innovation lab at the company, to learn about their digitalisation efforts.
-
